DETAILED ACTION

Claim Objections

1. Claims 28-30 are objected to because of the following informalities: 'The machine-readable medium' should be 'The machine-readable storage medium'.

Appropriate correction is required.

Claim Rejections - 35 USC § 101

2. Claims 19-22 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Claims 19-22 recite 'a virtual machine monitor (VMM)...'. These claims merely recite software per se, which is not permissible under the Examination Guidelines for Computers – Related Inventions.

Claim Rejections - 35 USC § 112

3. Claims 1-30 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Applicant has added the limitation 'without requiring any user interaction between receiving the request to transition control to the VM and transitioning control back to the VMM'. The limitation is not seen within the specification; therefore, these claims lack enablement.

Specification

4. The abstract of the disclosure is objected to because 'An exemplary method may includes' should be 'An exemplary method may include'. Correction is required. See MPEP § 608.01(b).

Response to Arguments

5. Applicant's arguments with respect to the rejection(s) of claim(s) 1-30 have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, new rejections have been made. Please see the rejections and objections disclosed above.
